

GURUGUBELLI JAYARAM

+91 9542289088 • jayaramgurugubelli4@gmail.com • linkedin.com/in/jayaram-gurugubelli • github.com/JayaramGurugubelli

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in AWS Cloud infrastructure and full-stack development using Java, Spring Boot, and Angular. Skilled in designing scalable RESTful APIs, cloud automation with Terraform, containerization with Docker, and version control with Git. Strong foundation in data structures, OOP principles, and microservices architecture.

EDUCATION

Bachelor of Technology, Computer Science and Engineering
GMR Institute of Technology

CGPA: 9.10/10.0
2022 – 2026

TECHNICAL SKILLS

Languages: Java, C++, JavaScript, Python, SQL

Backend: Spring Boot, Spring Framework, REST APIs, JDBC, JWT Authentication, Microservices

Frontend: Angular, HTML5, CSS3, JavaScript, Responsive Design

Databases: MySQL, Database Design, Query Optimization

Cloud & DevOps: AWS (EC2, S3, IAM, VPC), Terraform, Docker

Tools: Git, GitHub, AWS CLI, Linux, Ubuntu, Windows

Testing: JUnit, TestNG, JMeter, LoadRunner

Core Competencies: Data Structures, Algorithms, OOP, DBMS, System Design, REST API Design

PROFESSIONAL EXPERIENCE

AWS Cloud Infrastructure Intern • Hashtak

December 2025 – March 2026

- Learned AWS cloud services including EC2, S3, IAM, VPC provisioning and management
- Gained hands-on experience with Terraform for infrastructure automation and Infrastructure as Code practices
- Learned containerization concepts using Docker for application deployment
- Trained on Git version control and collaborative development workflows
- Gained knowledge in AWS security best practices and IAM policy configuration

TECHNICAL PROJECTS

Full-Stack Online Food Ordering System • Java, Spring Boot, Angular, MySQL, REST APIs, JWT

github.com/JayaramGurugubelli/Food-Ordering-App

- Architected production-grade full-stack application with user and admin modules featuring 40+ API endpoints
- Designed RESTful APIs using Spring Boot with 3-tier layered architecture (Controller, Service, Repository, Entity)
- Implemented JWT authentication and role-based access control (RBAC) securing 25+ API endpoints
- Optimized MySQL database queries with indexing and pagination techniques
- Built responsive Angular frontend with 12+ reusable components supporting multiple device sizes
- Implemented comprehensive product filtering, shopping cart, and order management features
- Designed normalized MySQL schema with 8 tables for user management, products, and orders
- Managed source code using Git with version control best practices
- Developed 72 test cases covering functional and edge case scenarios using JUnit and TestNG

ACHIEVEMENTS & RECOGNITION

- Solved 200+ algorithmic problems on LeetCode demonstrating problem-solving proficiency
- HackerRank 3-Star Coder with multi-domain coding expertise
- Founder and Lead of Campus Coding Club mentoring 60+ students in Data Structures and Algorithms
- Maintained 9.10 CGPA throughout engineering program ranking in top 5% of batch
- Published 5+ technical articles on Medium covering Java backend development and cloud technologies
